EDUCATION

University of Ghana, Legon
B.Sc. Computer Science | January 2025 – Present

Relevant courses: Data Structures and Algorithms, Numerical and Computational Methods, Information Modeling and Specification, Computer Organization and Architecture, Software Engineering, Mathematics

St. Peter's Senior High School

Science: Elective Mathematics, Physics, ICT

EXPERIENCE

Ghana Civil Aviation Authority (GCAA) | Industrial Attachment | ICT Section | One Month

- Digitalized physical documents using a scanner and entered records into a web-based database.
- Organized physical archives and provided basic IT support.
- Gained exposure to how technology supports daily operations in a government organization.

Customer Service Provider, UG Gates | September – December, 2025

- Assisted with registering e-cards for automatic gates, monitoring e-gate movement and control, and handling customer care services.

SkullVibes | Web and Android Application
Marketing Team

Raku Vehicle Sales and Rental Management System | Team Project | DCIT 208

Built the whole working system for a team working with a real client.
Served as Product/Client Manager for a team working with a real client.
Wrote the user stories section of the Software Requirements Specification and aligned it with use case models.

- Contributed to UML use case and sequence diagrams.

Figma UI Redesigns

- Recreated and redesigned the Podia website and Airbnb & Spotify iOS screens in Figma.
- Recreated and redesigned pepperderm.net website for a food restaurant.

Chef Apedo Foods

- Vertically integrated, full-stack food delivery application for high-volume campus food rushes. Students customize meals and place orders with instant dynamic campus delivery fees; kitchen staff monitor real-time orders through an auto-updating Kitchen Display System (KDS); dispatch couriers navigate deliveries and verify physical cash/MoMo collection.
- Automated engines send transactional SMS alerts, collect customer reviews, and broadcast promotional messages through the Agoo SMS gateway.

Smart Campus Service Operations Optimizer | University of Ghana | DCIT 204/308

- Chana-localized platform for maintenance requests, resource allocation, shuttle routing, and campus services using custom data structures, algorithms, database integration, testing, and performance analysis.

Fashion Retail AI Hackathon | Mensah-Retail

Full-stack e-commerce platform designed for a clean, fast, intuitive shopping experience from
